# INDEX

## to 'Electronics & Power'

## Volume 15 1969

### A

*Abacus, the Chinese* (letters) 216, 294, 370, 410, 442
*Academics and practicals* (letters) 105, 214, 252
Acoustic holograms, phase-only 180
Acoustic waves, liquid crystals display 406
*Advertising exposed* (letter) 294
Air conditioning for an integrated building 402
Aircraft control, research on 179
Alarm, intruder, seismic, can recognise footfalls 140
Aleksander, I. *Academics and practicals* (letter) 252
Alexander, C. E., Winch, K., and Belch, R. (*See* Belch)
Allen, J. E. *Engineering arts* (letter) 331
Aluminium cables for GPO 289
Ammeter, portable r.f., for accurate standardisation 376
Anderson, J. C. *Thin-film transistors* 90
Announcements to IEE members 31, 76, 109, 145, 181, 223, 261, 299, 333, 374, 418, 446
Annual general meeting of the IEE, 1969 257
Annual Report of the IEE Council for 1968–69 165
Antenna, novel 240
Ash, E. A. *Applied research in the university—the case for the defence* 275
Ashby, E. W. *Overhead lines* (letter) 26
*Assessing student performance* by E. Fairbrother and B. H. Venning 345
*Assessing superior responsibility* (letter) 177
Assessing superior responsibility: the implications of bylaw 11*a* 101
Audio-visual system, new 64
Automatic classifier of inclusions in steel aids quality control 99
*Automation in the home* (letter) 32
Avalanche diodes, higher powers from 28
Averaging the peak amplitudes of pulses 403

### B

Balloons, Nimbus 240
Banks, L. *Re-employment of engineers in the UK* (letter) 215
Banner, E. H. W. *Transmission and supply voltages* 128
Barber, M. D. *QE2's turbogenerators* (letter) 107
Bardo, A. T. *Teaching reliability* (letter) 254
Barlow, G. W. *Using the correct fuse* (letter) 216
Bateson, A. *Re-employment of engineers in the UK* (letter) 215
Battery life increased by round electrodes 400
Belch, R., Alexander, C. E., and Winch, K. *Computer control at Fawley* 152
Bell, C. A. *Looking at units* (letters) 107
Bell, D. A. *Research in universities* (letter) 26
Benson, F. A. *The scope of modern electronics* 11
Betts, J. A. *International communication: satellites and submarine cables* 234
Bibby, G. L., Clifford, P. M., and Rawcliffe, J. (*See* Rawcliffe)
Bird, T. J., and Edwards, J. C. *The designer/maintainer interface in the Royal Navy* 40
Blakey, P. *Religious circle* (letter) 410
Boley, T. A. *Fuel problems* (letter) 253
Borcherds, P. H. *Superconductivity* (letter) 73
Boyce, T. C. *Thermoelectric d.c. transformer* (letter) 372
Boyse, C. O. *Overhead lines* (letter) 72
Brennan, J. *Network analysis* 162
Brewster, P. J., and Cameron, A. H. (*See* Cameron)
Bruce, C. E. R. *Changes in the laws of physics* (letters) 106
Bruce, C. E. R. *Quasars* (letter) 372
Bruce, C. E. R. *Spark breakdown* (letter) 71
Brushless frequency changer completes tests 134
Buchan, M. F. *Industrial/educational interface* (letter) 292
Butcher, H. *Overhead lines* (letter) 177

### C

'C.Eng.' (letters) 24, 139
Cable, telephone, 'jelly'-filled, keeps out water 100
*Cables, fully filled* (letter) 176
*Cables, underground power, past, present and future* by D. T. Hollingsworth 314
Cables, undersea, new transistors for 22
Camera, Apollo, uses single-tube system 248
Camera, new underwater 100
Cameron, A. H., and Brewster, P. J. *Communication and data acquisition in a gas supergrid* 427
Capturing data on site 376
Cathodes for electron tubes, cold 248
Cattermole, K. W. *Reforming the universities* (letter) 369
CEI annual report 256
*CEI registration* (letters) 106, 178
Chadwick, P. J. *Engineers and management* (letter) 138
Chimney, Drax, new construction techniques used in 239
*Chinese abacus, the* (letters) 216, 294, 370, 410, 442
*Circuit and schematic diagrams* (letter) 24
*Circuit design, online* by D. G. W. Ingram 52
Circuit, power-supply stabilising 135
Circuit testing 27
*Circuits, flexible* by R. B. Quarmby 350
Clarke, R. L. *Professional engineers and trade unions* (letter) 293
Clausen, H. *Traction problems with linear motors* (letter) 371
Clifford, P. M., Rawcliffe, J., and Bibby, G. L. (*See* Rawcliffe)
Coal industry, new hope for 218
Coaxial cables, pinpointing faults in 356
Colliver, D. J. *Academics and practicals* (letter) 252
*Colour discrimination* (letter) 371
*Colour studio costs* (letter) 24
*Communication and data acquisition in a gas supergrid* by A. H. Cameron and P. J. Brewster 427
*Communication satellites and submarine cables* by J. A. Betts 234
Communication—word for word 189
Components, cleaner 135
Components—state of the industry 423
Computer-aided design 45
*Computer-aided design* (letter) 252
Computer-aided design of microcircuits 161
Computer aids for circuit design 51
Computer aids new array design 63
*Computer aids to mechanical-engineering design* by E. J. C. Fowell 56
Computer assistance for air-traffic control 289
*Computer control at Fawley* by R. Belch, C. E. Alexander and K. Winch 152
Computer control, finger-tip 360
Computer, general-purpose, uses l.s.i. circuits 173
*Computer graphics, interactive, the case for* by J. V. Oldfield 59
Computer-program library 39
Computer program simulates protection relays 291
Computer share prices 208
Computer speeds up holograms 218
Computer technology 39
Computers: Datafair '69 339
*Computers for the data-processing user: the real needs* by T. R. Thompson 311
*Concorde* (letters) 72, 139, 176
Connectors for aerospace and electronics 290
Construction techniques, new, used in Drax chimney 239
*Control, computer, at Fawley* by R. Belch, C. E. Alexander and K. Winch 152
*Controlling the economy—an exercise in collaboration* by P. Parks and G. Pyatt 270
*Conversational computing* by V. H. Fass 46
Copple, A. C. *Concorde* (letter) 72
Cotsell, G. W. *Early filament lamps* (letter) 177
Cotter, M. *The Chinese abacus* (letter) 442
*Council elections* (letter) 294
Cowell, A. R. *Tailpiece* (letter) 178
Cox, H. N. *Computer-aided design* (letter) 252
Crew, E. W. *Atmospheric electrical discharges* (letter) 409
*Crisis in change* (letters) 25, 107, 177
Cross, Catherine. '*C.Eng.*' (letter) 24
Crystal oscillators, Mullard develops high-stability 242

### D

Data, capturing on site 376
Data controller, online 22
Data display, c.r.t., improved 135
Davies, I. F. *Chinese abacus* (letter) 294
Davey, V. S., and Rye, J. *Insulated sodium conductor—has it a future in Britain?* 395
Dacon, G. E. R. *Engineering aspects of oceanography* 340
*Degree-day isotherms* (letter) 176
*Designer/maintainer interface in the Royal Navy* by T. J. Bird and J. C. Edwards 40
*Design process* (letter) 25
*Discharges, Atmospheric electrical* (letter) 409
Display, miniature solid-state alphanumeric 140
Display terminals, new techniques in 376
Distribution research at Capenhurst 444
Dorward, L. F. '*C.Eng.*' (letter) 139
Dougharty, W. *Professional engineers and trade unions* (letter) 137
Drax chimney 331
Driscoll, L. *Using the correct fuse* (letter) 137
Duck, D. R. *Advertising exposed* (letter) 294
Duff, G. E. *Design process* (letter) 25
Dunman, F. R. *Early filament lamps* (letter) 106
Dunster, D. F. *Principles and realities* 210
Dutnall, H. W. *Questions of law* (letter) 294

### E

Eastwood, E. *Radar, birds and aircraft* 116
Edmundson, D. *Electrical manufacture today and tomorrow* 392
Edmundson, D., IEE President, 1969–70 357
Education and engineers—the big teach 269
*Education for high voltages* (letter) 330
Education: the eternal student 229
Edwards, J. C., and Bird, T. J. (*See* Bird)
Elections and transfers 32, 77, 109, 145, 183, 224, 261, 299, 334, 374, 447
*Electrical manufacture today and tomorrow* by D. Edmundson 392
Electricity supply, docks' 400
Electron microscope completes tests 401
Electron microscope, focusing aid for 70
Electronic aids to car design 434
Electronic master controls slaves 209
*Electronics: high and low power* by W. T. Johnson 156
*Electronics, modern, the scope of* by F. A. Benson 11
Ellis, J. H. *The Chinese abacus* (letters) 216, 370
*Employment of engineers* (letter) 26
*Engineer and the law, the* by H. B. Morton 205
*Engineer in Parliament* by A. Palmer 120
Engineer in society 423
*Engineer in society* (letters) 295, 369
Engineering and the services 115
*Engineering arts* (letters) 331, 373, 409
*Engineering arts* by R. J. Harrison 243
*Engineering aspects of oceanography* by G. E. R. Deacon 340
*Engineering fraternity* by J. M. Meek 1
*Engineering qualifications* (letters) 72, 254
*Engineers and management* (letters) 23, 24, 138, 174
*Engineers and the economy* (letters) 72, 178
*Export problem* (letters) 139, 216, 293

## F

Fairbrother, E., and Venning, B. H. *Assessing student performance* 345
Faraday Medal: 47th award, to P. Sporn 76
Fass, V. H. *Conversational computing* 46
Favil, W. A. *Crisis in change* (letter) 25
Felix, M. O. *Information retrieval* (letter) 174
Fibre optics display faults in switching systems 360
*Field control—a new concept in work organisation* by K. W. Finch 87
Finch, K. W. *Field control—a new concept in work organisation* 87
Finger-tip computer control 360
Fitton, D. *Teaching reliability* (letter) 217
Flexible circuitry used in Maxi 241
*Flexible circuits* by R. B. Quarmby 350
Fluidics control i.c.s 289
Foster, C. *Professional engineers and trade unions* (letter) 331
Fowell, E. J. C. *Computer aids to mechanical-engineering design* 56
Freeman, C. F. *IEE Power Division Chairman, 1969–70* 358
Frequency-doubling circuit 28
*Fuel problems* (letter) 253
*Fuses* (letters) 137, 216, 255

## G

Gainsborough, G. F. *Professional engineers and trade unions* (letter) 137
Gamlin, J. F. *LECO '70* (letter) 254
Gange, H. G. *Science and philosophy* (letters) 213, 370
Generation: fuel policy 151
*Generator, power, harmonic* by D. Holland and G. T. Russell 17
Generator, undersea 102
Gill, A. J. *Inductor alternator* (letter) 175
*Glass in integrated circuits* by W. J. Scott 94
Golde, R. H. *A plain man's guide to lightning protection* 84
Goldfarb, B. *Professional engineers and trade unions* (letter) 409
Goldspink, G. F. *Education for high voltages* (letter) 330
Goldstein, S. G. *Engineers and management* (letter) 174
Goonhilly satellite earth station inaugurated 359
Grayer, I. W. *Quicker by air* (letter) 108
Griffiths, L. H. *Colour studio costs* (letter) 24
Groocock, J. M. *Reliability problem* 404
Gunn devices, 3-terminal, used in negative-resistance amplifiers 27
Gunn-effect oscillators, more power from 332

## H

Haddow, L. M. *Phasor diagrams/electrical theory* (letter) 370
Halacsy, A. A. *Transformer technology* (letter) 213
Hall, J. J. S. B. *Model building for management* (letter) 108
Hambly, S. C. *Fuel problems* (letter) 253
Hammond, B. J. *2000 years of therapeutic electricity* 190
Hammond, P. *Views on E & P* (letter) 137
Harding, J. R. *Services for chartered engineers* (letter) 255
Harding, M. *Degree-day isotherms* (letter) 176
*Harmonic power generator* by D. Holland and G. T. Russell 17
Harrett, T. *The anti-Concorde lobby* (letter) 176
Harrison, G. B. *Sixth-form projects* (letter) 176
Harrison, R. J. *Engineering arts* (letter) 409
Harrison, R. J. *Engineering arts* 243
Haslam, J. R. *Academics and practicals* (letter) 252
Hayden, J. T. *Superconductivity and possible applications in transportation* 281
Heap, H. R. *Information retrieval* (letter) 174
Heftman, G., and Hills, D. S. (*See* Hills)
Henderson, H. *Problems of technological updating* 125
*High-voltage engineering in universities: teaching and research* by B. Salvage 249
Hills, D. S., and Heftman, G. *The matricon cathode-ray tube* 123
Hitchings, D. *Radioactive lightning conductors* (letter) 293
Hodgson, J. M. J. *CEI registration* (letter) 106
Holden, S. *Pattern recognition* (letter) 73
Holland, D., and Russell, G. T. *A harmonic power generator* 17
Hollingsworth, D. T. *Underground power cables—past, present and future* 314
Holmes, R. *IEE publications* (letter) 331
Holmes, R. *CEI registration* (letter) 178
Holmes, R. *Teaching in Scotland* (letter) 371
Holograms, crystals store 70
Holographic memory used in typesetting machine 443
Holography aids aircraft instrumentation 219
Holttum, W. *Patents and the engineer* 24
Honorary Fellowship (IEE): Election of Sir Gordon Radley 77
Horwood, H. *Engineers and the economy* (letter) 72
Horwood, H. *Science and philosophy* (letter) 409
Hughes, T. G. *Professional engineers and trade unions* (letter) 215
Hunter, H. K. *'C.Eng.'* (letter) 139
Hunter, H. K. *Early filament lamps* (letter) 106
Hurst, S. L. *Circuit and schematic diagrams* (letter) 24
Hurst, S. L. *Teaching reliability* (letter) 216
Hyde, A. D. *Whither the IEE?* (letter) 441

## I

IEE Annual General Meeting, 1969 257
IEE Annual Report for 1968–69 165
IEE Control & Automation Division Chairman, 1969–70. P. L. Taylor 358
*IEE correspondence courses* (letter) 294
IEE Divisional Chairmen, 1969–70 358, 445
IEE Electronics Division Chairman, 1969–70. J. A. Saxton 358
IEE Power Division Chairman, 1969–70. C. F. Freeman 358
IEE Professional group committees, 1968–69 76
IEE Professional group committees, 1969–70 445
*IEE publications* (letter) 331
IEE Science & Education Joint Board Chairman, 1969–70. E. R. L. Lewis 445
*IEE, whither the* by J. K. Wood 361
*IEE, whither the* (letter) 441
*Inductor alternators* (letters) 32, 104, 175
*Industrial/educational interface, the* (letters) 292, 293, 330, 369, 408, 441
*Industrial revolution—the next stage* (letter) 368
*Industrial revolutions—two or three?* by D. B. Welbourn 284
Industry: catching up in electronics 151
Information indigestion 83
*Information retrieval* (letters) 174, 214
*Information, technical, the retrieval of* by D. Rowse 96
Infrared, London by 296
Ingram, D. G. W. *Online circuit design* 52
*INSPEC—a new concept in information services* by M. D. Martin and J. R. Smith 66
*Insulated sodium conductor—has it a future in Britain?* by V. S. Davey and J. Rye 395
*Integrated circuits, glass in* by W. J. Scott 94
Integrated circuits read handwritten characters 325
Integrated computer circuits use magnetic 'bubbles' 375
Integrated crystal filters 64
*International communication: satellites and submarine cables* by J. A. Betts 234
Ionospheric backscatter, coastline mapping using 102
Irwin, J. N. *Teaching reliability* (letter) 177

## J

Jackson, M. R. *Model building* (letter) 73
James, B. M. *Engineering arts* (letter) 373
James, B. M. *Models in psychology* 386
Jelonek, Z. J. *Reforming the universities* (letter) 369
Johnson, W. T. *Electronics: high and low power* 156
Joining dissimilar materials 376
Jointing of aluminium cables, automatic 444
Jones, G. R. *Phasor diagrams* (letter) 26, 105, 255
Jones, R. D. *Information retrieval* (letter) 214

## K

Keeping time with electronics 360
Khatib, H. *Engineers and the economy* (letter) 178
King, F. J. *Teaching reliability* (letter) 104, 217
Kohli, D. R., and Ray, L. M. (*See* Ray) (letter)

## L

Laithwaite, E. R. *Linear induction motors for high-speed vehicles* 230
Lamps, early (letters) 106, 177
Langridge, F. R. *The industrial educational interf* (letter) 441
Laser beams to thin films, prism couples 332
Laser, high power $CO_2$ 102
Laser will help to clean up German atmosphere 2
Lasers applied to standardisation 161
Lasers, measuring turbulence with 297
Lasers, new c.w. 241
*LECO '70* (letter) 254
Leicester, E. J. *Engineers and management* (lett
Leigh, B. R. *Probability theory and Boolean alge* (letter) 175
Levitation at Sussex 406
Levy, S. L. *Taming a technology—some aspects the microcircuit industry* 320
Lewis, E. R. L. IEE Science & Education Jo Board Chairman, 1969–70 445
Li, Y. L. *Chinese abacus* (letter) 410
Lightburn, P. J. *Sleep and dreams* (letter) 176
*Lighting* by B. Lightoller 3
*Lightning and the transmission engineer* by A. B. Wo 195
*Lightning, death by* (letter) 255
*Lightning protection, a plain man's guide to* by R. Golde 84
*Lightning theory* (letter) 410
Lightoller, B. *Let there be light* 3
*Linear induction motors for high-speed vehicles* by E. Laithwaite 230
Linear induction pumps for liquid metal 247
Linley, B. D. *Professional engineers and trade unio* (letter) 408
Linsley Hood, J. L. *Industrial/educational interface,* (letter) 330
Live-line working, bare-hand, demonstrated by CEG 407
*Logic and the engineer* by S. Towill 382
Lord Bowden. *Crisis in the university—is anarchy the rule?* 306
Lyon, G. *Phasor diagrams* (letter) 105
Lythall, R. T. *Academics and practicals* (letter) 1

## M

McAnulla, R. J. *Engineers and management* (lette 23
MacCarthy, D. *Engineers and management* (letter) 2
McDonald, F. G. *Academics and practicals* (lette 252
Mackechnie Jarvis, C. *Nikola Tesla and the inductio motor* 436
McKenzie, D. M. *Industrial/educational interface, th* (letter) 330
McSparrow, J. A. *Professional engineers and trad unions* (letter) 136
McWhirter, I. *Therapeutic electricity* (letter) 295
Machines proposed, reciprocating electrical 247
Machine-tool design, light pen aids 63
Mackrill, H. W. *Professional associations* (letter) 7
Magnetic holograms for fast memories 359
Magnetic store indexed by electron beams 406
Marconi and Preece (letter) 105
Margolis, D. S. *Metrication—an apology for SI units* 431
Marshall, R. C. *Wiring regulations* (letter) 293
Martin, M. D., and Smith, J. R. *INSPEC—a ne concept in information services* 66
Mask-making time reduced 70
Materials from Texas 135
*Matricon cathode-ray tube* by D. S. Hills and G Heftman 123
Measurement conference 305
Measurement, contactless, of parabolic reflectors 29
*Measurement for man* (letter) 108
*Measurement matters* by J. Rawcliffe, G. L. Bibb and P. M. Clifford 354
Meek, J. M. *An engineering fraternity* 1
Memory, fastest in Europe 241
*Metrication—an apology for SI units* by D. S. Margoli 431
Metrication—change of standards 381
*Metrication* (letters) 24, 442
Microacoustics 180
*Microcircuit industry, some aspects of* by S. L. Levy 32
Microcircuits, new consumer applications for 403
Microcircuits on call 219
Microelectronics: custom design 229
Microfilm retrieval system for British Standards 10
Microscope resolves individual atoms 141
Microscopy service 219
Microstrip filters using avalanche diodes 402
Microwave glidepath, new i.l.s. system will use 297
Miley, J. *Engineering qualifications* (letter) 254
Military technology—another winner for Britain 2

Miller, W. L. E. *History of the inductor alternator* (letter) 104
Minter, R. W. *Engineering arts* (letter) 331
. *The engineer in society* (letter) 369
Mitchell, J. W. *Crisis in change* (letter) 177
*Model building* (letters) 73, 108
*Models in psychology* by B. M. James 386
Morgan, M. D. *Professional engineers and trade unions* (letter) 137
Morton, H. B. *The engineer and the law* 205
M.O.S. circuits in Concorde 240
Motor microstep, developed at the RRE 173
Motor research sets standards for industry 296
*Motors for high-speed vehicles, linear induction* by E. R. Laithwaite 230
Munro, H. *The crisis in change* (letter) 107
Murdoch, P. *RNC obituary* (letter) 370
Muyobo, N. Ba. K. *Engineering qualifications* (letter) 72

## N

Nancarrow, F. E. *Marconi and Preece* (letter) 106
Navaids, keeping an eye on 434
*Network analysis* by J. Brennan 162
*Network analysis* (letter) 255
*Network conventions* by M. G. Say 355
New products 33, 79, 111, 147, 185, 225, 263, 301, 335, 377, 419, 449
New techniques in display terminals 376
Nicholson, G. F. *RNC obituary* (letter) 255
*Nikola Tesla and the induction motor* by C. Mackechnie Jarvis 436
Nomenclature—naming new notions 83
Nuclear pacemaker developed 332
Nuclear power—UKAEA order 189
Numerical control for propellor machining 401
Numerical control programs 65
Nutting, D. C. *Employment of engineers* (letter) 26
Nye, D. J. *Professional engineers and trade unions* (letter) 331

## O

Obituary 31, 73, 109, 144, 182, 224, 260, 298, 334, 373, 410, 446
*Oceanography, engineering aspects of* by G. E. R. Deacon 340
O.C.R. units for Giro 325
Officers of the IEE 142, 172
Officers of the Institution, 1969–70 411
Oldbury, concrete progress at 242
Oldfield, J. V. *The case for interactive computer graphics* 59
Omar, I. *The Chinese abacus* (letter) 442
*Online circuit design* by D. G. W. Ingram 52
Oscilloscope, new, uses computer-designed tube 326
Ottey, E. H. *Teaching in Scotland* (letters) 253, 372
*Overhead lines* (letters) 26, 72, 177

## P

Pacemakers, new development in cardiac 180
Palmer, A. *The engineer in Parliament* 120
Parks, P., and Pyatt, G. *Controlling the economy—an exercise in collaboration* 270
*Patents and the engineer* (letter) 24
*Pattern recognition* (letter) 73
Paul, E. M. *Early filament lamps* (letter) 177
Payne, G. L. *Using the correct fuse* (letter) 295
Pendry, J. K. *Sixth-form projects* (letter) 72
Ph.D. philosophy 269
*Phasor diagrams* (letters) 26, 105, 177, 255, 370
*Phasor diagrams/electrical theory* (letter) 441
Phipps Hornby, W. M. *Metrication* (letter) 442
· *Tailpiece* (letter) 178
*Physics, changes in the laws of* (letter) 107
Pinpointing faults in coaxial cables 356
Pioneer power station, end of a 399
Plastics film, new, for electrical insulation 65
Pocock, R. F. *Marconi and Preece* (letter) 106
· *The first radio-telegraph transmission* 327
Portable r.f. ammeter for accurate standardisation 376
Potier, O. N. *Industrial/educational interface, the* (letter) 408
Power invertors for Apollo project 326
President of the IEE, 1969–70, D. Edmundson 357
Price, B. *Engineers and management* (letters) 23, 175
*Principles and realities* by D. F. Dunster 210
Printed-circuit process, new 209
Printed-circuit production, automatic 443
Pritchett, J. *Fully filled cables* (letter) 176
*Probability theory and Boolean algebra* (letter) 175
*Problems of technological updating* by H. Henderson 125
*Process control for profit* by D. Taylor 201
*Professional associations* (letter) 71
*Professional engineers and trade unions* (letters) 136, 137, 215, 216, 293, 331, 373, 408, 442
*Psychology, models in* by B. M. James 386
Pyatt, G., and Parks, P. (*See* Parks)

## Q

Quarmby, R. B. *Flexible circuits* 350
*Quasars* (letter) 372
QE2's turbogenerators 22
*QE2's turbogenerators* (letter) 107
*Question of law* (letter) 294
*Quicker by air* (letter) 108

## R

*Radar, birds and aircraft* by E. Eastwood 116
*Radioactive lightning conductors* (letter) 293
*Radio-telegraph transmission, the first* by R. F. Pocock 327
Radio transmitters, prediction of service areas for v.h.f., by computer 291
Radley, Sir Gordon. Honorary Fellowship 77
Radome installation automatically inflated 100
Random reflections on 1968 2
Rawcliffe, J., Bibby, G. L., and Clifford, P. M. *Measurement matters* 354
Ray, L. M., and Kohli, D. R. *Schrage motors* (letter) 175
*Re-employment of engineers in the UK* (letters) 104, 215, 373
*Reforming the universities* (letters) 369, 370
*Reliability problem* by J. M. Groocock 404
*Reliability, the need to teach* by R. C. Winton 8
*Reliability, the need to teach* (letters) 104, 137, 138, 253
*Religious circle* (letter) 410
*Research, applied, in the university—the case for the defence* by E. A. Ash 275
Research: better value for money 189
Research—ERA's year of change 381
*Research in universities* (letter) 26
*Retrieval of technical information* by D. Rowse 96
Richardson, C. C. *Teaching reliability* (letter) 216
Richardson, J. R. *Network analysis* (letter) 255
Rickard, J. K. *Professional engineers and trade unions* (letter) 442
Ridsdale, H. A. C. *Using the correct fuse* (letter) 216
*RNC obituary* (letter) 370
Robb, C. *Industrial revolution—the next stage* (letter) 368
Robb, Crawford. *Crisis in change* (letter) 25
Robinson, O. D. *Views on E & P* (letter) 137
Robless, D. A. *IEE correspondence courses* (letter) 294
Ross, I. M. *Council elections* (letter) 294
Rowse, D. *The retrieval of technical information* 96
*Royal Navy, designer/maintainer interface in* by T. J. Bird and J. C. Edwards 40
Rush, P. D. *Technical journals* (letter) 408
Russell, G. T., and Holland, D. (*See* Holland)
Rye, J., and Davey, V. S. (*See* Davey)

## S

Saben, D. R. *Professional engineers and trade unions* (letter) 215
Sadler, E. H. *Technical journals* (letter) 408
Safety at Sea 99
Salvage, B. *High-voltage engineering in universities: teaching and research* 249
Sanderson, I. V. *The Chinese abacus* (letter) 294
Sands, M. J. E. *Science and philosophy* (letter) 213
Sargrove, J. A. *Professional associations* (letter) 71
Satellite communication, increasing the efficiency of 135
Saxton, J. A. IEE Electronics Division Chairman, 1969–70 358
Say, M. G. *Network conventions* 355
Sayers, D. P. *Assessing superior responsibility: the implications of bylaw 11a* 101
Schools to link to ICL computer 64
*Schrage motors* (letters) 175, 254
Science and philosophy 115
*Science and philosophy* (letters) 213, 295, 370, 409
Scott, W. J. *Glass in integrated circuits* 94
Scott, W. J. *Professional engineers and trade unions* (letter) 373
Scroggie, M. G. *Phasor diagrams* (letter) 177
Scroggie, M. G. *Phasor diagrams/electrical theory* (letter) 371
Semiconductor deposition technique, SGS develops new 248
Semiconductor, optimum microwave 325
*Services for chartered engineers* (letter) 255
Shackleton, N. D. *Wiring regulations* (letter) 214
Sharp, P. E. M. *Automation in the home* (letter) 32
Shaw, D. *Teaching reliability* (letter) 138
SI base units, new definitions of 164
Simplifying editing of punched paper tapes 360
*Sixth-form projects* (letters) 72, 176
*Sleep and dreams* (letter) 176
Smith, D. *Design process* (letter) 25
Smith, F. C. E. *Export problem* (letter) 293
Smith, J. R., and Martin, M. D. (*See* Martin)
Snell, E. H. *Tailpiece* (letter) 178
*Sodium conductor, insulated—has it a future in Britain?* by V. S. Davey and J. Rye 395
Solid-state lamps, second-generation in production 375
Somasundaram, G. D. *Death by lightning* (letter) 255
Space—aftermath of Apollo 305
Space workbench 'downs' tools 218
Spark breakdown (letter) 71
Speech distortion in helium atmospheres, eliminating 242
Sporn, P. Award of Faraday Medal to 76
Stephen, K. *Re-employment of engineers in the UK* (letter) 104
Steven, R. E. *The tragedie of MacHine: a play on two axes* 122
Stretton-Downes, J. N. *Academics and practicals* (letter) 214
· *The industrial/educational interface* (letter) 369
*Student performance, assessing* by E. Fairbrother and B. H. Venning 345
*Student performance, assessing* (letter) 441
*Subscriptions to publications* (letter) 25
*Superconductivity* (letter) 73
*Superconductivity and possible applications in transportation* by J. T. Hayden 281
Superconductor oscillations, R.F. 247
Superconductors, optical examination of flux in 218
Superplastics 141
Switchgear duty, motors step up 403
Switching systems, fibre optics display faults in 360
*Systems engineering* by B. Wilson 424
Szwander, W. *Academics and practicals* (letter) 214

## T

Tactical training 21
*Tailpiece* (letter) 178
Tachogenerator, low-noise 400
Taylor, D. *Process control for profit* 201
Taylor, G. C. *Drax chimney* (letter) 331
Taylor, P. L. IEE Control & Automation Division Chairman, 1969–70 358
*Teaching in Scotland* (letters) 253, 371
Teaching in the nuclear age 269
*Teaching reliability* (letters) 177, 216, 217
*Technical journals* (letter) 408
Technical publications 20, 44, 95, 122, 155, 217, 238, 349, 391
*Technological updating, problems of* by H. Henderson 125
Technology and society 115
Telephone connections, new echo suppressor for 103
Television in Concorde 135
Television, multiprogramme, from satellites 325
Television set, electroluminescent screen, used in 435
Television set, experimental pocket 134
Television, transmitters for colour 173
Television-tube production speeded up 27
*Therapeutic electricity* (letter) 295
*Therapeutic electricity, 2000 years of* by B. J. Hammond 190
*Thermoelectric d.c. transformer* (letter) 372
Thick-film microcircuits in radios 21
Thin-film adhesion, improving 179
Thin-film capacitors 406
*Thin-film transistors* by J. C. Anderson 90
Thomas, A. G. G. *The anti-Concorde lobby* (letter) 139
Thomas, D. J. *Assessing superior responsibility* (letter) 177
Thomas, P. A. *Professional engineers and trade unions* (letter) 136
Thompson, T. R. *Computers for the data-processing user: the real needs* 311
Thurlow, P. *Using the correct fuse* 255
Thyristor amplifiers, direct digital control of 103

Thyristor devices assist balancing of jet engines 208
Thyristor control, integrated, of d.c. multiload systems 102
Thyristor control, offshore drilling under 135
Thyristor performance, IR enhances 434
Towill, S. *Logic and the engineer* 382
Tracey, P. M. *The export problem* (letter) 139
*Traction problems with linear motors* (letter) 371
*Tragedie of MacHine: a play on two axes* by R. E. Steven 122
Trail-blazing at Sheffield 376
Training—recruiting engineers 381
*Transformer technology* (letter) 213
Transformers, aluminium foil and plastics film used in 219
Transformers, improving heat loss in 290
Transformers, superconducting, prospects for 443
Transistors, new, for undersea cables 22
Transistors, new technique for fabricating 179
*Transistors, thin-film* by J. C. Anderson 90
*Transmission and supply voltages* by E. H. W. Banner 128
*Transportation, superconductivity and possible applications in* by J. T. Hayden 281
*Tube, matricon cathode-ray* by D. S. Hills and G. Heftman 123
Tubes, electron, cold cathodes for 248
Turbogenerators, giant, for QE2 22
Turnbull, J. C. *Inductor alternators* (letter) 32

## U

UK-4 to explore the upper ionosphere 140
Ultrasonic impact grinding using diamonds 28
Ultrasonic probe tests welds 208
*Units* (letter) 107
*University, applied research in—the case for the defence* by E. A. Ash 275
*University, crisis in the,—is anarchy the rule?* by Lord Bowden 306
*Using the correct fuse* (letter) 295

## V

Validators, paper-currency, use i.c.s 435
Van Bueren, M. *Metrication* (letter) 24
Valve actuator for process control 326
Venning, B. H., and Fairbrother, E. (*See* Fairbrother)
Vibrations teach blind children to talk 64
Vibration technique detects loose particles in electronic equipment 28
*Views on E & P* (letters) 137
Vision by 'feel' 180
Voice-operated typewriter, STL develops 141
*Voltages, transmission and supply* by E. H. W. Banner 128

## W

Walford, T. R. N. *Subscriptions to publications* (letter) 25
Walker, A. A. C. *The export problem* (letter) 216
Walker, J. H. *Science and philosophy* (letter) 295
Waste product 332
Webster, W. A. *Teaching reliability* (letter) 253
*Weights and measures* (letter) 295
Welbourn, D. B. *Two industrial revolutions—or three?* 284
West, R. A. *Phasor diagrams/electrical theory* (letter) 441
West Burton power station adds 2000 MW to Grid 209
Whillock, A. F. *Measurement for man* (letter) 108
*Whither the IEE?* by J. K. Wood 361
*Whither the IEE?* (letter) 441
W. I. G. Reid. *The industrial/educational interface* (letter) 293
Wilde, D. S. *The Chinese abacus* (letter) 294
Williams, A. *Professional engineers and trade unions* (letter) 136
Williams, J. *Professional engineers and trade unions* (letter) 136
Williams, J. A. *Lightning theory* (letter) 410
Wilson, B. *Systems engineering* 424
Winch, K., Belch, R., and Alexander, C. E. (*See* Belch)
Wind effects, ERA research into 70
Winton, R. C. *Engineer in society* (letter) 295
· *Teaching reliability* (letter) 137
· *The need to teach reliability* 8
*Wiring regulations* (letters) 214, 293
Withers, M. G. E. *Colour discrimination* (letter) 371
Wolfenden, J. F. *Assessing student performance* (letter) 441
Wood, A. B. *Lightning and the transmission engineer* 195
Wood, B. *Industrial revolution—the next stage* (letter) 368
Wood, J. K. *Whither the IEE?* 361
Woodhead tunnel cable project, CEGB completes 435
Wright, A. *Professional engineers and trade unions* (letter) 136
Wright, A. J. L. *Schrage motors* (letter) 254

## Y

Yates, J. D. *Re-employment of engineers in the UK* (letter) 373
Young. K. J. *The Chinese abacus* (letter) 294
· *Weights and measures* (letter) 295
